

29 May 1980

MEMORANDUM FOR: Acting Deputy Director for Administration
FROM: Bruce T. Johnson
Director of Data Processing
SUBJECT: ODP Report for Week Ending 28 May 1980

Support to Office of Strategic Research

Minicomputer Study. We met for the first time on 21 May 1980 with members of SEC/OSR to discuss their requirements for a stand-alone minicomputer system. We were presented a very general overview of how the data is handled today versus how they foresee it being handled by a minicomputer. We plan to hold additional meetings to gather detailed user requirements. [REDACTED]

STATINTL

Automated Message Processing System (AMPS) Problems

A conglomeration of hardware, software, configuration, and procedural problems was visited upon AMPS service to NFAC customers in epidemic proportions during the past week. While each new problem was dealt with in turn and no problem was long lived, this was of little solace to the NFAC users who viewed the large assortment of odd problems as one big pain. Currently all is quiet and well with AMPS. We hope to see AMPS now return to the same high level of performance which we had become accustomed to prior to the past week. [REDACTED]
